

Features and Benefits

Always Accessible

XLex is embedded in your mobile phone. You do not need a GPRS/WAP/Internet connection, just access XLex whenever and wherever to look up the needed vocabulary.

Handy Input and Easy Navigation

English Input is the default setting when you open XLex. Key in the word you are looking for and the screen will display the words beginning with the letters you typed.

- **Predictive Text** helps you to key in the correct word, even if you do not know the exact spelling. **Predictive Text** displays all the words which begin with the letters you start keying in. With each added letter the selectable words get narrowed down.

- **Chinese Input** allows you to enter Chinese characters. Choose between the Zhuyin, Pinyin or the Stroke Systems and use the input method which is most convenient for you (For the XLex English-Chinese version).
- **OCR (Optical Character Recognition)** makes the input of vocabulary even more convenient. Use the camera of your mobile phone to scan over the text and XLex will recognize the word you want to look up. You do not even have to key in the word by yourself (For handsets with cameras only).
- **Touch Screen** lets you quickly maneuver through XLex with a few touches on the screen (For handsets with touch screen capability only).

Reliable Results and Correct Pronunciation

- **Results** not only display the translations for the word you are looking up, it also gives more details about each of the translations. Learn about the correct pronunciation and check the explanations to have a better idea of how to use the translation.
- **Reverse Translation** lets you check which of the results is the one which is the best fit. After looking up a word, there may be multiple terms given in the results. Choose a term and let XLex translate it back to double check if you chose the correct translation.
- **Text to Speech** makes sure that you always know the correct pronunciation of the word/translation in question. In just one click, you can hear a native speaker pronounce the vocabulary for you.

XCome's XLex is an easy-to-use bilingual/bi-directional mobile dictionary application which allows you to instantly access its word base of up to 100,000 words to find the right translation anytime and anywhere. Based on the Longman database, a world-renowned educational publisher, XLex is fast, easy and reliable.

Convenient Access to Often-Used Words

- **History** saves the most recently used words. Use this quick overview to review the words which you recently looked up.
- **Bookmarked Words** let you store up to 15 words which you want to use frequently and make quickly accessible. This feature gives you an easy way to repeatedly look up these words, so it is easier for you to memorize them, which makes this feature a great learning tool.

Improve Your Word Power

Use the following features to learn more words in addition to the one you were looking for and rapidly improve your word power.

- **Synonyms** offer a comprehensive overview of words similar in meaning to the word you are looking up.
- **Antonyms** present you with a precise list of words with the opposite meaning.
- **Related Words** give you a tool to browse through a catalog of words related to the one you are looking up.
- **Phrase** lists all the different expressions which start with the word in question (e.g. take and take off).
- **Grammar** offers additional grammatical information for each vocabulary.

XCome's products can be fully customized according to a manufacturer's requirements. What language combination or file size is needed? XCome can deliver it. Our partnership with Longman provides a large number of languages to choose from including: Arabic, Albanian, Chinese, French, German, Greek, Hebrew, Hindi, Italian, Japanese, Polish, Portuguese, Russian, Spanish, Thai, Urdu.

Specifications:

Software Requirements

The XCome mobile-learning applications run on the following platforms:

- J2ME CLDC/MIDP 1.0
- J2ME CLDC/MIDP 2.0
- Symbian OS 6.x
- Other OS with porting service

Hardware Requirements

The word database memory requirements depend on the languages, the configurations and the data base size. Please refer to the following table as an example. The following table does **not** include Text to Speech (TTS). With TTS please add 1.6 MB to the respective size.

Words (Engl. - Chin.)	Size
23,000	1.9 MB
46,000	2.7 MB
57,000	3.2 MB
85,000	3.3 MB
100,000	3.6 MB

Note: All the above mentioned versions include a 37,000 word Chinese - English data base.

Compatible Devices

XCome's mobile-learning applications are compatible with all mobile phones that meet the above-mentioned software and hardware requirements.
